

BMW Radios, to suit individual tastes

Every part to which BMW gives its name is worth special confidence. This also applies to car radios. BMW car radios come up to the highest demands with regard to ease of operation, reliability and quality of reproduction. Special fitting kits and anti-interference kits are available.

BMW Bavaria radios have been designed to match the cockpit of your BMW. All Bavaria car radios are now available with a facility for automatic reception of local traffic information (not applicable in all countries). The system is very simple:

When the VF button is pressed, the programme being received is automatically interrupted and the traffic announcements can be heard. Even if the radio is on lowest volume, the traffic warning can be heard at normal levels.

In S. Defective units are simply replaced by your BMW dealer free of charge during the 12 months guarantee period, for a small charge later on). NOTE: - Not true in all countries.

BMW Car Radio Bavaria S/VF

The well proven basic model of the BMW Bavaria radio series. A powerful and reliable all-waveband set with press buttons for long, medium, short and VHF. AFC and interference suppression in the VHF range.

BMW Bavaria CR/VF (full stereo)

This is a high quality 4 waveband set (LW, MW, SW, VHF). It has an integrated stereo cassette player with fast forward and reverse and automatic change-over from cassette to radio operation at the end of the tape. An electronic interference suppression circuit ensures trouble-free VHF reception - very important in the case of traffic warnings.

With an output of 2 x 7 watts with four loudspeakers (2 x 5 watts with two loudspeakers) and an excellent reproduction quality the BMW Bavaria CR/VF continues the tradition of the BMW car radios.

On request, the Bavaria radios can be supplied without the automatic traffic information facility.

BMW/Blaupunkt Bamberg Electronic (full stereo)

A really top-notch model with automatic station finding, reception and recording of stereo transmissions. Music cassette playback, speech recording on tape. As a further plus point, the recorder has an automatic record-level control, automatic tape end switch with cassette ejection, a microphone with start-stop switch. The set is prepared for the connection of a traffic information decoder. Wavebands: LW, MW, SW, VHF.

Additional loudspeakers improve the tone quality. Even when driving noise level is high, all occupants can still enjoy musical entertainment. Stereo sets may be fitted with four speakers, two in side members at front and two on the rear shelf.

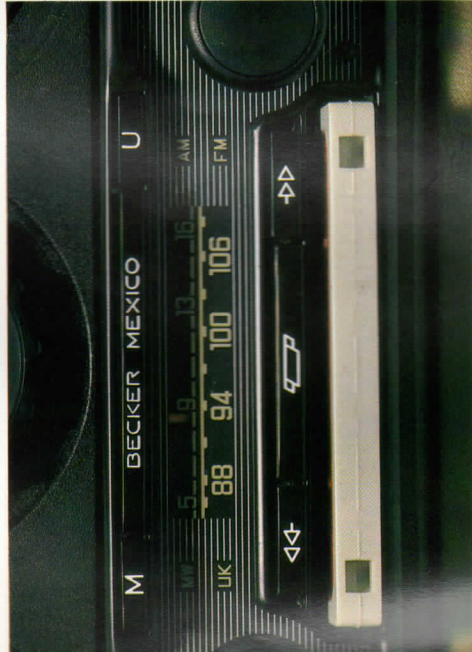

BMW/Blaupunkt Toulouse CR

The modern alternative to the normal telescopic aerial. Improved performance particularly in the stereo reception range. Matt black chrome-plated and space-saving. The electronic 2 channel booster (separate for VHF and LMS) is fitted at the side of the luggage compartment. The aerial can only be extended by using a special key to prevent damage and theft.

BMW/Becker Mexico CR (full stereo)

The quality of the aerial has a decisive influence on the performance of the radio. The BMW radio experts have therefore given particular attention to the efficiency of the aerials. The BMW range is an audible sign of the high technical standards at BMW.

BMW Aerials

A lockable, retractable telescopic aerial. Sturdy design in stainless steel. Current vehicles are prepared for the aerial installation (no drilling is necessary).

BMW Retractable Front Aerial

The modern alternative to the normal telescopic aerial. Improved performance particularly in the stereo reception range. Matt black chrome-plated and space-saving. The electronic 2 channel booster (separate for VHF and LMS) is fitted at the side of the luggage compartment. The aerial can only be extended by using a special key to prevent damage and theft.

BMW Electronic Rear Aerial

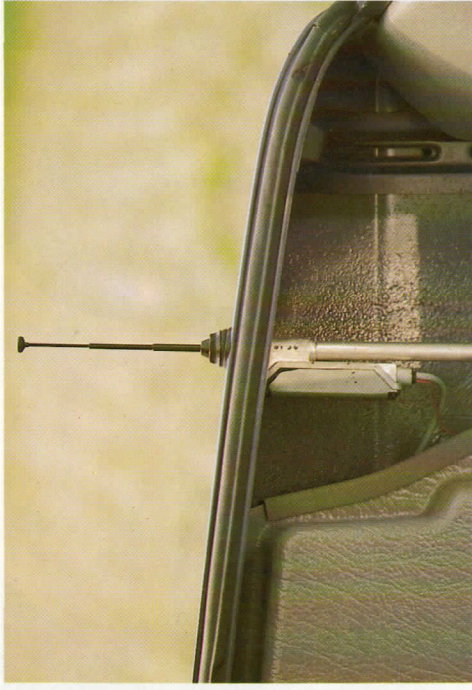

This aerial comes up and goes down as you switch radio off and on or as you start or switch off the engine. A sound technical development. Supplied from model BMW 518 onwards.

BMW Automatic Aerial

For each BMW radio set there are special installation and suppression kits especially designed for each particular model. Further information and specialist advice can be obtained from your BMW Dealers.

BMW Radio Accessories

For each BMW radio set there are special installation and suppression kits especially designed for each particular model. Further information and specialist advice can be obtained from your BMW Dealers.

BMW Interior Equipment

The standard interior trim of a BMW is up to the standard of international top level automobiles. A special range of genuine BMW accessories can improve this high standard even further.

BMW Air Conditioner

An air conditioner is not a luxury. It is an important contribution to driving safety because it ensures that the driver feels comfortable and helps to maintain him in good condition. The BMW recirculation system prevents exhaust gas from being drawn in when the air conditioner is put into operation. The temperature in the vehicle stays uniformly pleasant – regardless of weather conditions.

Technical data

Air distribution: Evaporator integrated in ventilation system.

Air circulation: Radial blower $7\text{m}^3\text{--}8.7\text{m}^3/\text{min}$.

(depending upon the model)

Maximum refrigeration output 4500 to 6200 Kcal/h.

Refrigerant: Frigen 12 (CF₂CL₂)

Maximum Capacity: 900 g–1000 g.

The BMW air conditioner shown here is a complete kit for subsequent installation (specially designed for individual BMW models). The various components are incorporated in the engine compartment and in the central console.

BMW Gear Lever Knobs

Four different versions are available of solid, fine grained hard-wood or covered with matt black leather. With or without BMW emblem. They make a welcome present.

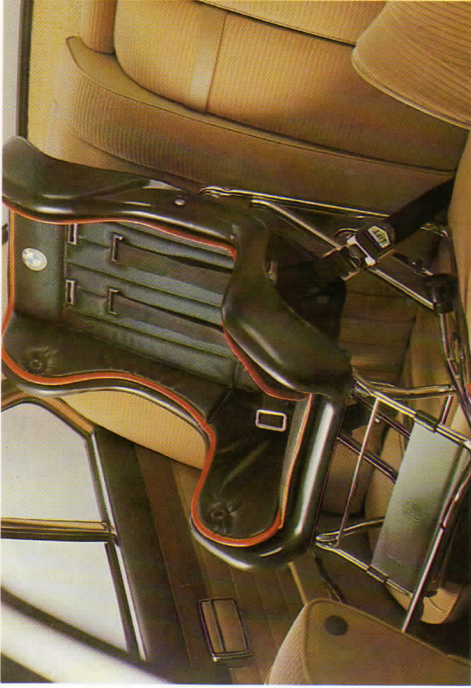

BMW Recaro Sports Seat

Fast driving becomes a new experience for driver and passenger in these seats. The rally-tested, bucket-shaped padding gives optimal lateral support. Seating comfort, particularly on long trips is excellent due to anatomically shaped seats and the adjustable thigh supports. The seats are available in cloth, leatherette or leather. Colour: Black. If you select cloth the texture of the cloth can be matched to the upholstery of your BMW.

BMW Seat and Head-Rest Covers

This made-to-measure cover is manufactured exclusively for BMW. The fully synthetic material requires little attention and makes driving pleasant in winter and summer by compensating for temperature changes. The rear seats and head-rests can also be fitted with this hard-wearing material – it is particularly recommended for BMW owners with small children or "four-legged" passengers.

BMW Childs Safety Seat

In addition to the Junior system for larger children, BMW also offers a seat for small children. The size and strength are designed for children from sitting-up age to a maximum weight of 18 kg, and a height of 105 cm. Child is secured by a brace type belt with a central press-button buckle, and can sit up or sleep. The raised seating position enables child to see what is going on. Fitting is simple to BMW models.

BMW Childs Safety System "Junior"

For only the best is good enough. Measures to ensure the safety of your child definitely fall into this category. The "Junior" safety device has been developed by BMW over a period of several years and has undergone more than 100 crash tests with child dummies and numerous functional trials. For your child this means: Safe travel without the feeling of being restricted or tied in. The seat shell can be used on both sides. One side for children

with a weight of about 15 kg. (4-5 years) the other side for children up to a weight of about 25 kg. (6-7 years). The child is secured with a brace-belt with retractor which fits over the shoulders and the pelvis area. When the child has out-grown the seat, it can use the belt alone until it has a weight of about 36 kg. (12 years) and is then large enough to use a normal adult belt.

The BMW "Junior" safety system is available for all BMW models from model year 1971 (in preparation for the Coupe models) and for other modern automobiles with an adequate rear parcel shelf. For older children you can order the "Junior" belt separately.

BMW Head-Rests and 3 Point Inertia Reel Belts for Rear Seats

Your rear seat passengers will appreciate the comfort and safety of this equipment. The belt retractors offer adequate freedom of movement but hold wearer firmly in seat. The head-rests are adjustable in height and provide optimal protection in a rear end collision.

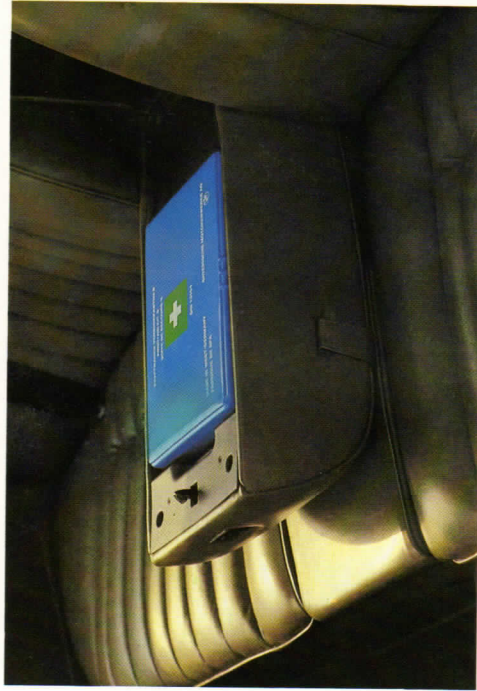

BMW First Aid Cushion

First aid cushions can be left on the rear seat and are thus always within easy reach. The various items are sealed separately in transparent foil. Soft, protective special cushion with zip fastener. The cushions comply with German standards and are available in brown, blue and black.

BMW First Aid Box

A first aid kit is one of the most important things you should have in your car. The contents are up to German standards and are sealed separately in PVC foil. On the 7 series vehicles, the box can be put in the centre arm-rest.

BMW Fire Extinguisher

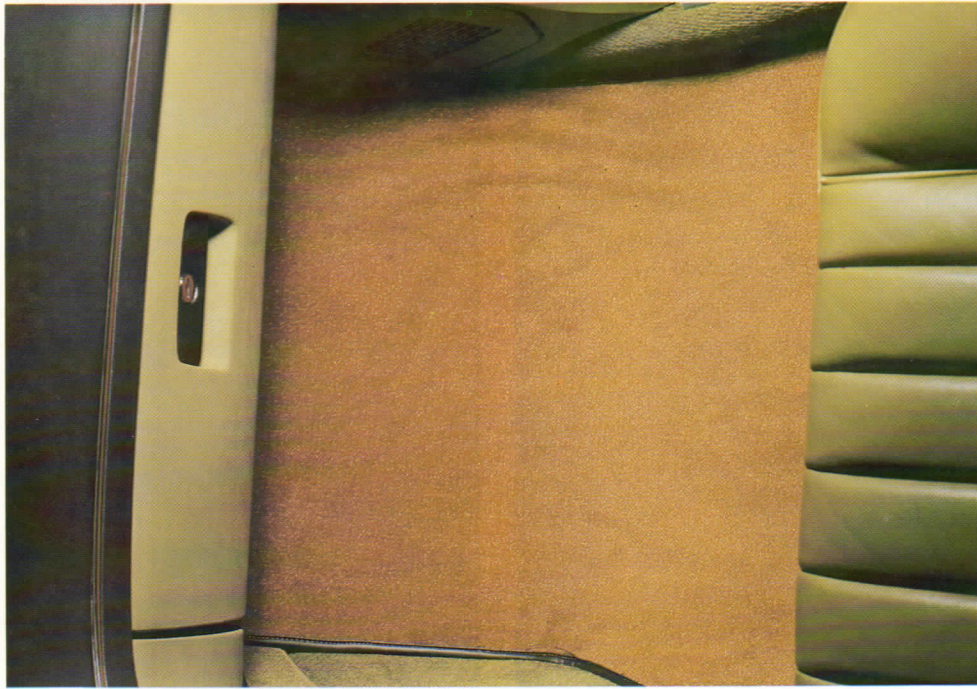

Can be obtained as 1 kg. or 2 kg. version. One hand operation with pistol-type trigger. Readiness for use can be checked at any time with a press button.

A special bracket holds the fire extinguisher firmly in position.

Large BMW Tool Kit

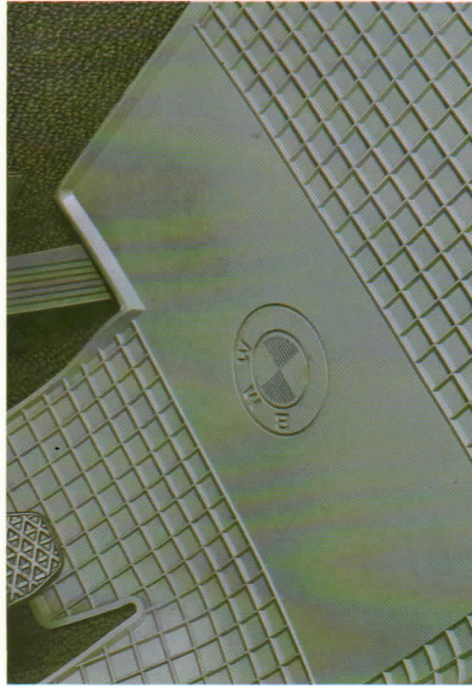

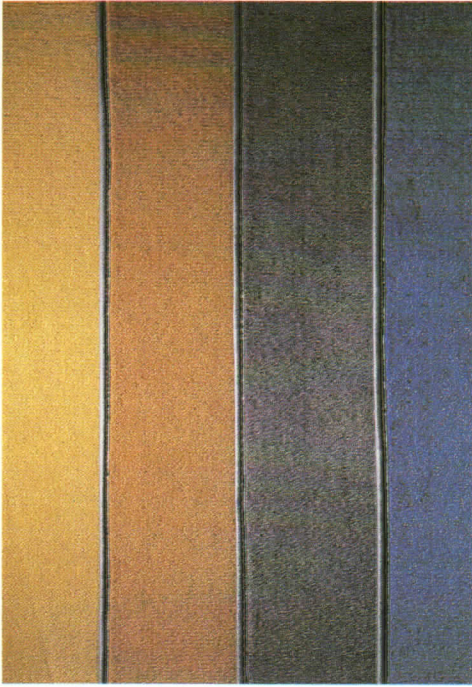

It is often observed that people who are interested in high quality automobiles develop a desire to do various things to the car themselves. This large tool kit is a very practical accessory and the wide assortment of tools can prove useful in the house as well. From BMW 730 the large kit is standard.

BMW Floor Mats

An important aspect with regard to the resale value of a vehicle is care and protection of the floor covering. The items offered all equal BMW quality standards.

BMW Velours Floor Mats

These mats are of first-class wool velours material, accurately fitted, anti-slip and flame-proof. The back is rubberised and the edges seamed all round. Secured with Velcro strip or press buttons. The driver's mat has an additional black heel protective plate. A set consists of two mats for both front and rear. Available in various colours.

BMW Rubber Floor Mats

Raised edges and a checkered pattern collects dirt and moisture. Highly recommended for snow and mud. These mats are of good heavy-grade material. They are anti-slip, accurately fitted and available as two-mat or four-mat sets for front and rear.

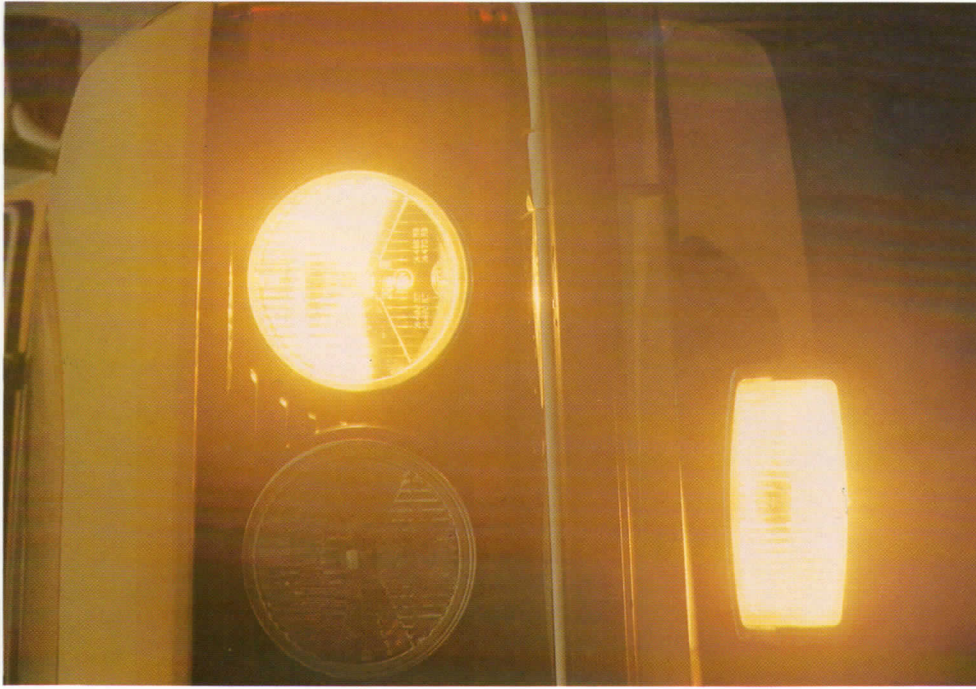

BMW Coco Floor Mats

An extremely hard-wearing, flame-resistant mat of first quality material reinforced with sisal. The mat is rubberised on the back and secured with Velcro strip to prevent slipping. Supplied for the 3 and 5 Series in various colour combinations.

BMW Alloy Wheels

Alloy wheels are not only a means of making your BMW look nicer. They also have a very practical effect. Light alloy wheels reduce the unsprung weight and this makes the spring/damping characteristic of the wheel more sensitive and helps to improve road-holding. Every BMW alloy wheel is subjected to additional material tests and each one is X-rayed at the factory. You can be sure that they are of maximum strength.

BMW Lights

Seeing and being seen are two basic requirements for safety on the road. Make use, therefore, of the BMW light range if you wish to improve the standard lighting of your BMW even further.

BMW Halogen Fog Lights

BMW fog lights help to reduce the dangers of driving in fog. The Genuine BMW Installation Kit contains two high quality lights, H3 Halogen bulbs, relays and the special fitting parts for each model. The connecting wiring is already in the vehicle.

BMW Fog Light Covers

Keep the lights clean and protected from stone damage. Their bright colour provides additional safety on the road.

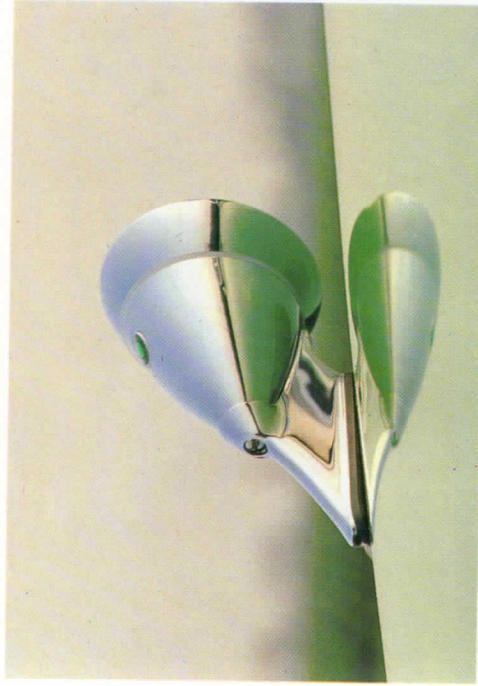

BMW Rear Fog Light

These lights protect your vehicle from the rear as they are considerably brighter than the standard tail-lights. High quality material and workmanship. Available as an installation kit for the BMW 316-323i models and incorporated as standard in the rear light clusters on all other models.

BMW Headlight Washer

The most expensive headlights are no good if the lenses are covered with a layer of dirt. An effective, reliable improvement is a BMW headlight washer. The loss of light due to dirt on the lenses on wet roads is 40%. At temperatures around the freezing point when salt is being used on slushy roads this increases to 60-75%. The washer has been tested under the most severe conditions and is also suitable for service installation. The BMW special system for single or double headlights consists of two motors, wipers, fluid container, an electric pump and a wash-wipe relay.

BMW Mirrors

There are many mirrors of different qualities on the market and they look much the same. One should, however, look carefully at quality, suitability and fitting. BMW mirrors are tested high quality products.

BMW Sports Mirror – Talbot

A streamlined mirror for fitting to the side of the bonnet. Heavy chrome or black version. Particularly durable and rust-resistant. Can be fitted on left or right. Available for all BMW models.

BMW Electrically Controlled Exterior Mirror extra

This highly practical accessory can contribute considerably to your safety. Not only is it more convenient to adjust your mirror from inside the car – you may also ensure that your mirror is adjusted exactly at all times. Also available for passenger side door.

BMW Interior and Exterior Mirrors

The importance of knowing what is happening behind you is stressed by BMW with a carefully conceived system of mirrors which can be adapted to suit your personal desires. No matter which one you select, Genuine BMW accessories are always the best solution.

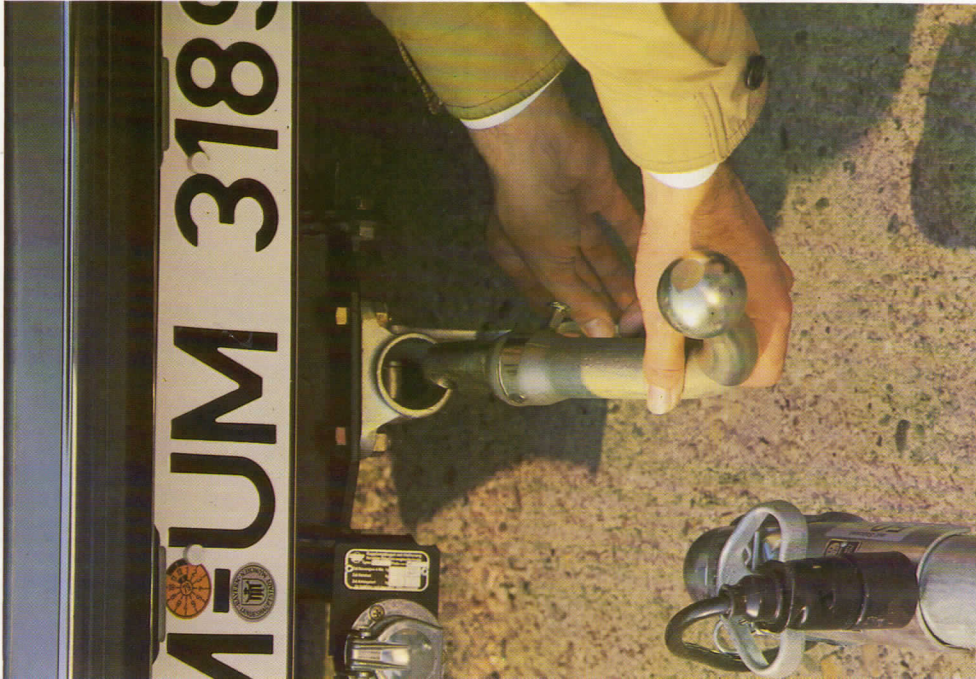

BMW Lockable Filler Cap

Better safe than sorry. That is why BMW offer a lockable filler cap. This filler cap can also be obtained to match the uniform locking system of your car, so that you only need one key for all the locks of your car. Can be easily installed on BMW 316-518, on all other models it is standard.

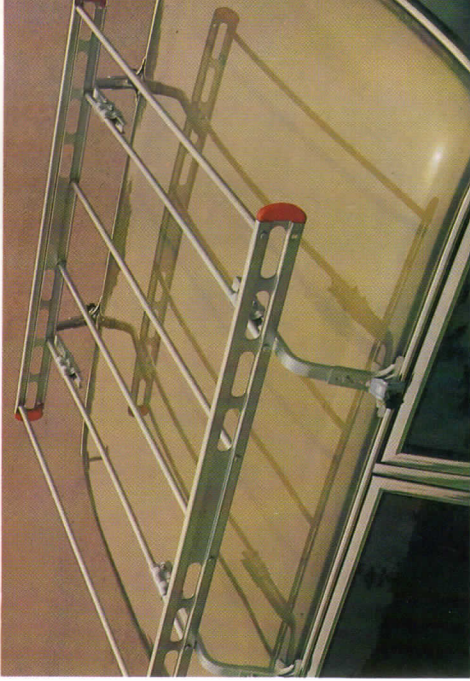

BMW Mud Flaps

For considerate drivers who wish to be courteous in traffic. The flaps keep down the spray and slush which normally affects the visibility of the driver behind you. They also protect your own vehicle from dirt and stone damage.

BMW Tow Bars

owing a trailer is made much easier with a tow bar that is especially designed for the chassis and the floor plates of your vehicle. For every BMW model there is a type-approved bar. Tests carried out by BMW under all operating conditions guarantee optimum safety. Fixed and detachable ball ends are available (see Page 39). The trailer weights range from 500 to 2000 kg, depending upon the vehicle. Drawbar load 50–75 kg.

BMW Roof Racks

An additional load space for items for which there is no room in the vehicle or which are too large to be stored inside. Easy fitting adjustable in height and width. Available in rigid or "foldaway" version. Maximum load 50 kg.

BMW Ski Racks

A useful item for keen skiers. Supplied in normal or lockable version for the safe transportation of up to 6 pairs of skis. As for the

BMW Snow Chains

lockable version, neither the skis nor the rack can be removed without the use of force. Can be fitted and removed in minutes.

BMW Snow Chains

BMW Snow chains ensure safe progress at all times. The strong, especially hardened, high quality steel chains guarantee easy fitting and safe driving. Especially designed to match each BMW model. Special construction features: shortlinked components, additional gripping links, reversible – can be used on both sides. Supplied in a strong plastic box.

Trailer bracket with detachable ball coupling has two further advantages: It can hardly be seen and extensive parking damage is avoided if you should accidentally touch another vehicle.

W Wind Deflector

Draught-free and pleasant driving with the sliding roof open. The BMW wind deflector requires no special fitting, it is just placed in position and secured from inside.

BMW Boot Space Bucket

The strong easy-to-clean Hostalen bucket completely covers the compartment and protects it from moisture, dirt and damage. Ideal for work and hobby. Easy to insert and remove.

BMW Touring Case

This case is specially designed to fit exactly against the side panel of the luggage compartment. Robust construction with upward opening lid, petrol and oilresistant. Can be used to hold such things as tow-ropes, warning triangles etc.

BMW Emergency Triangle

This type approved BMW triangle is easy to set up and fold together, made of high quality material with a heavy base. The fluorescent plastic foil is visible from a great distance in the dark. Packed in a sturdy plastic case.

Note: Warning Triangles are compulsory in many countries.

Note: Warning Triangles are compulsory in many countries.

BMW Tow Rope

Strong material, safe in use – a Genuine BMW accessory. Not only useful when you break down, it can be used to help others.

BMW Spare Bulb Box

This strong little box contains replacements for the various bulbs on your vehicle. Every BMW driver should carry a box of spare bulbs. In some countries, this is already obligatory.

BMW Torch

The BMW torch is kept in the charging socket at the side of the glove compartment (standard since 1777 on all BMW models). It cannot overcharge and is always ready for use and particularly bright.

Also available from BMW is a torch with a retaining bracket and about 4 metres of cable. This strong and reliable version pivots and can be clipped in position. Kept in a case when not in use. Current is supplied from the cigarette lighter.

BMW Paint Touch-up Pencils

Small scratches and stone damage cannot always be avoided. These pencils are the ideal solution in such cases. They have an intensive mixer and a patented cap which prevents the paint from drying whilst in the pencil. The paint dries very quickly once applied and can then be polished with the paste contained in the cap. Repairs to metallic colours should be sealed with a second coat of clear varnish.

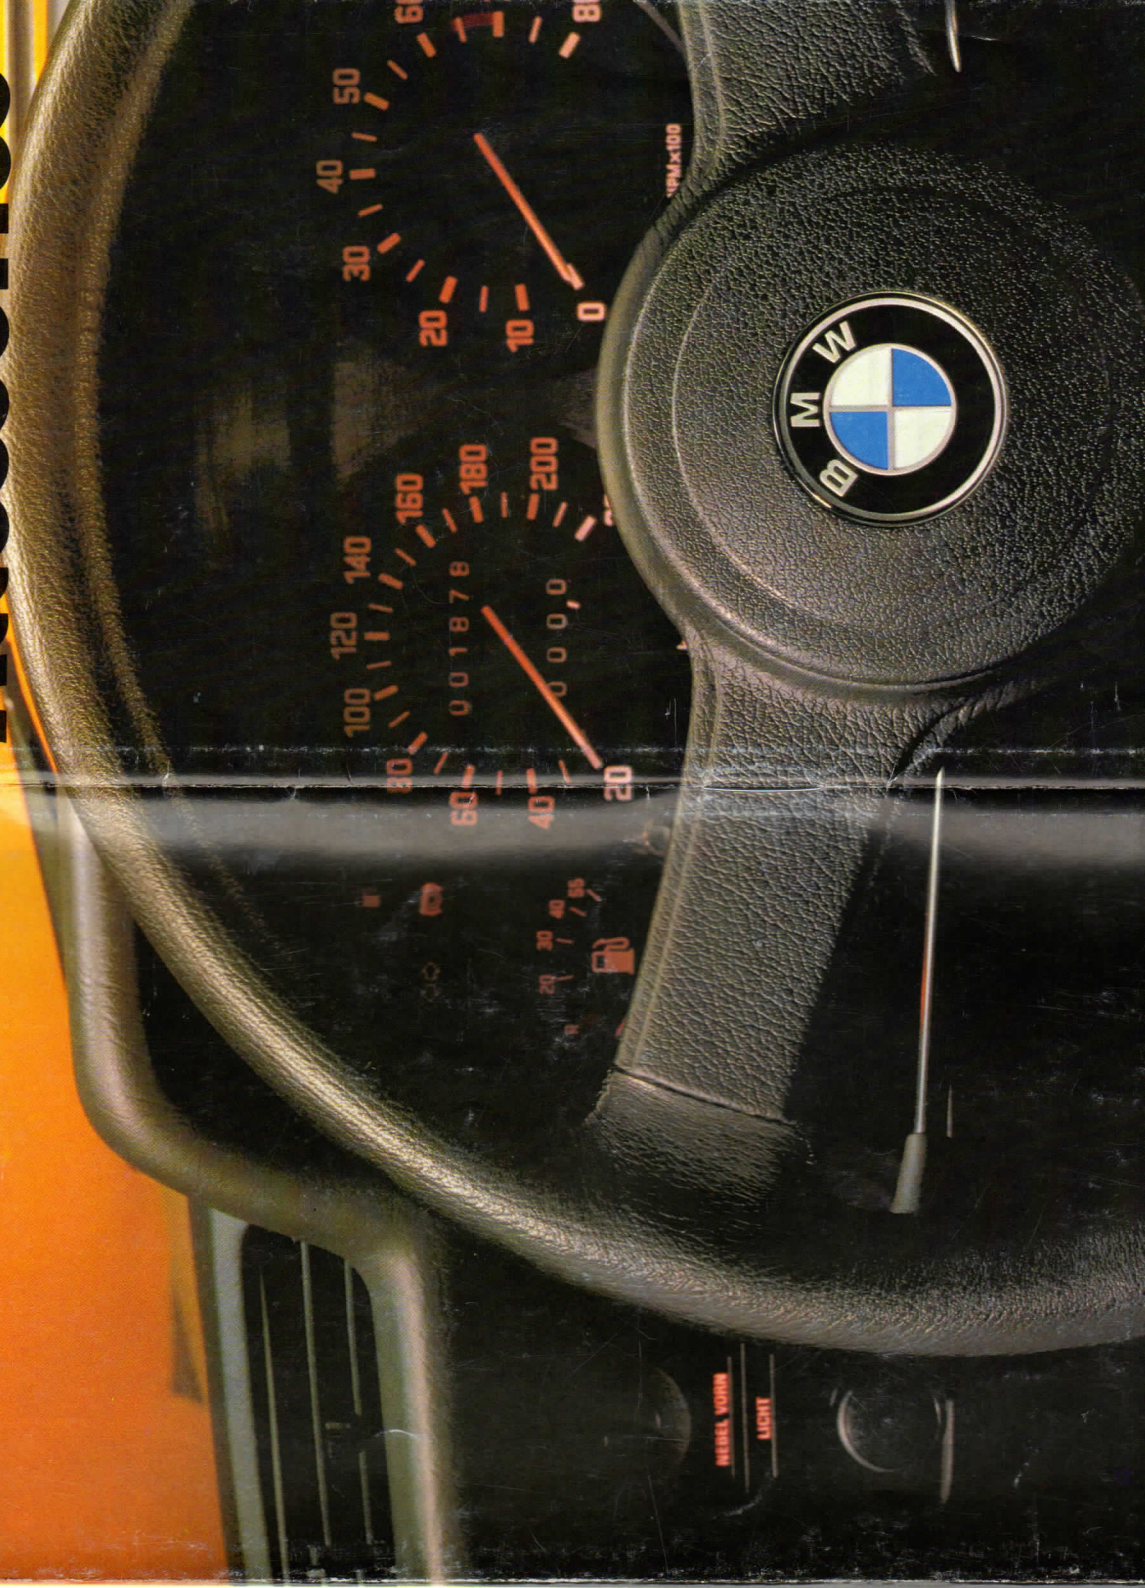

BMW Boutique-

A highly specialized boutique

All the items which you have seen in this brochure and many other useful items are on display in your BMW Dealer's Boutique. He will always be pleased to advise and help you. Ask him at the next opportunity, he also has Genuine BMW accessories for older BMW models, clothing and equipment from BMW Motorsport.

To increase driving pleasure:
The personal touch.

Genuine Accessories

Spray Paint Cans

offer a complete range of spray paints from primer to single- and metallic paints for current and also for older models. varnish and wheel paints are also available. The spray cans an intensive mixing component which ensures a uniform density and an even coat of paint at all times.

and equipment subject to change without notice, particularly items restricted to certain countries.
