 Design

Enthusiasm

ALPINA-deco-sets are available in royal blue, lustrous green and silver or any combination of two of these colours. They give your car a new identity and a sporty appearance. The design derives from the colour schemes of our successful production race cars. In addition to the basic "rallye stripes" used on many cars ALPINA deco-sets offer a new variation in emphasis: the usual (dark) appearance of most vehicles. ALPINA deco-sets consist of a high grade plastic foil, which is colour- and weather proof and not affected by gasoline. By following the included instructions, the deco-set can easily be fitted, and if desired just as easily be removed without harm to the finish of the car. This eliminates the risk of a costly and not always satisfactory multi-colour paint job. To assist you in selecting the correct deco-set, we include a sheet of appropriate colour combinations. This allows one to choose from over

100 different colour combinations, combining the three ALPINA colours with any BMW colour. To add the final touch to your deco-set you may surround it with a fine gold plastic-tye.

ALPINA-SPOILERS: ALPINA SPOILER improve the track coefficient thus reducing wind resistance. The results are a gain in top speed of approx. 8 mph, decreased fuel and oil at high speeds and lower fuel consumption. The brake cooling of course is not impaired and the attractive design of the spoiler can only enhance the appearance of your BMW.

ALPINA wheels have a classic spoke design. We are proud to offer this design in conjunction with a modern light alloy casting. It is tempting to copy such an exclusive wheel but, however, is somewhat difficult since our wheels, as well as all other ALPINA products in this prospectus, are patented.

ALPINA wheels are available in the following sizes: 8 and 9 1/2" (3 series), and 7 x 14, 7 1/2" and 10 inch wheels for the 5, 6, 4 and 7 series allow to take advantage of the latest in tire technology, the low profile 90 series tires.

To obtain the best possible handling narrower wheels and tires are used in the front than in the rear. This minimizes squirming and decreases steering effort while at the same time improving straight line stability.

For the 3 series cars

Front: 8 1/2 x 13" with 100-90 VR 16 tires

Rear: 7 1/2 x 13" with 90-90 VR 16 tires

For 5, 6 and 7 series cars

Front: 7 1/2 x 14" with 200-90 VR 16 tires

Rear: 8 1/2 x 14" with 200-90 VR 16 tires

Alpina-Designs usually appear at race events before they are offered for sale. The Alpina three-seater for instance derives from the colour schemes of our successful production race cars.

Individualism

The ALPINA identity programme extends beyond the technical aspect of our products as we also offer a fine selection of apparel for the enthusiast such as ALPINA sport jackets, ALPINA polo- and T-shirts and ALPINA umbrellas. These items are not available through regular department stores, only from ALPINA or BMW dealers who are affiliated with us. Therefore,

they are only available to a limited number of individuals which makes them a highly desirable addition to the exclusive ALPINA line of products.

The light alloy hand sewn leather-trimmed ALPINA steering wheel assures excellent road contact at all times. According to "SPORT-AUTO" it is a good example of ALPINA'S excellent taste. It is a well designed and constructed steering wheel with an attractive track finish.

The ALPINA seats are exceptionally well shaped enabling one to drive long distances without fatigue. This is the result of the ergonomically designed back- and headrest and proper thigh support.

The seats are covered with black "breathable" cloth which is accented by the green-blue ALPINA stripes. Two different models are available: A bucket seat which offers the best lateral support, and a fully reclining sport seat.

The latter one offers greater entry ease and more seating comfort, while still providing good lateral support. Both driver and passenger seats have easily accessible and back restresters, are adjustable in height and tilt, and are provided with features for head rests. For cars with black interiors we recommend to have the back seats upholstered with ALPINA cloth as well.
